

KAIZER KLENT C. AUCERAN

Junior Full-Stack / Back-End Developer

Barandias, Pangantucan 8717, Bukidnon, Philippines | kaizerklentauceran@gmail.com | +63 997 4164 343

kaizer-klent-auceran-34.vercel.app

PROFILE

Detail-oriented **Information Technology graduate** with hands-on experience architecture-building full-stack applications, real-time IoT configurations, and secure database solutions. Proven track record designing end-to-end CRUD engines, managing asynchronous REST APIs, and delivering reliable software for organizational deployment. Adaptable, self-directed developer comfortable building independently and translating complex workflows into stable production results.

CORE SKILLS

- **Front-End Development:** React, Next.js, HTML5, CSS3, JavaScript (ES6+), TypeScript
- **Back-End & Databases:** Node.js, REST APIs, Firebase (Realtime Database & Firestore), MySQL, Cloudinary
- **Hardware & Automation:** Arduino, ESP32 microcontrollers, Sensor integration, Serial communication
- **Tools & Methodologies:** Git, GitHub, Figma, UI/UX Mockups, Agile workflows, CRUD Architecture

SERVICES I CAN OFFER CLIENTS

- Build, update, or fix small business websites and landing pages
- Design social media graphics, banners, and simple marketing assets in Canva/Figma
- Organize and maintain data in Google Sheets, Excel, or Firebase (inventory, leads, records)
- Basic backend support: form integrations, database entry, API connections
- Light project/task tracking and file organization for ongoing web projects

WORK EXPERIENCE

Back-End Developer | 5th Civil Relations Group — Panacan, Davao City

Feb 2026 – Present

- **Architected and deployed** an end-to-end Inventory Management System (5th-CRG-IMS) to monitor asset lifecycles, item borrowing workflows, and fuel distribution records.
- **Engineered a custom CRUD interface** integrated directly with Firebase, replacing manual data management systems and eliminating logging human errors for daily operational staff.
- **Configured external cloud integrations** using Cloudinary for structured digital asset and media documentation storage.
- **Maintained system documentation** and provided close technical translation to ensure smooth onboarding for non-technical administrative personnel.

FEATURED PROJECTS

5th-CRG-IMS | React, Next.js, Node, Cloudinary, Firebase

- Developed a full-stack, live-updating logistics dashboard managing fuel tracking and operational inventory.
- Implemented secure state updates, asynchronous data fetching, and multi-media storage hooks.

TruckAlert | Java, REST API, Arduino, ESP32, COCO Dataset

- **Designed and programmed** an edge-computing safety system for large vehicles using microcontrollers and sensor matrices to alert operators to real-time hazards.
- **Integrated wireless API endpoints** to securely transmit data streams across a self-contained, optimized power management setup.
- **Leveraged object recognition datasets** to ensure robust categorization of peripheral obstacles like pedestrians, vehicles, and animals.

EDUCATION

Bachelor of Science in Information Technology | Holy Cross of Davao College

Aug 2022 – Jun 2026

- Coursework: IT Elective, Networking, Information Management, Introduction to Computing
