PROFILE

Detail-oriented background in full-stack web development and hands-on client project delivery. Skilled in building and maintaining websites, designing graphics and landing pages, managing data and content, and supporting small businesses with reliable, self-directed tech tasks. Comfortable working independently, communicating clearly with clients, and turning project requests into finished, working results.

CORE SKILLS

- Website & Landing Page Support: Next.js, HTML, CSS, JavaScript, TypeScript building, editing, and maintaining client websites
- Design Tools: Figma & Canva UI mockups, social media graphics, marketing visuals
- Data & Content Management: Google Sheets/Excel, Firebase, CRUD systems organizing, updating, and tracking client data
- Backend & Integrations: REST API, Node.js, MySQL, Firebase, Cloudinary connecting forms, media, and databases
- Collaboration Tools: GitHub, Git, AI-assisted tools (ChatGPT/Claude) for research, drafting, and troubleshooting
- Soft Skills: responsive communication, adaptability, self-management, attention to detail

SERVICES I CAN OFFER CLIENTS

- Build, update, or fix small business websites and landing pages
- Design social media graphics, banners, and simple marketing assets in Canva/Figma
- Organize and maintain data in Google Sheets, Excel, or Firebase (inventory, leads, records)
- Basic backend support: form integrations, database entry, API connections
- Light project/task tracking and file organization for ongoing web projects

WORK EXPERIENCE

Back-End Developer | 5th Civil Relations Group — Panacan, Davao City

Feb 2026 – Present

- Built and maintain an inventory management system, tracking every borrowed item and fuel dispense record end-to-end
- Manage and organize data across Excel and Firebase, keeping records accurate and easy for non-technical staff to use
- Integrated a CRUD system into Firebase to keep the interface simple and reliable for daily users
- Delivered a friendly, responsive user experience the same client-facing polish a VA project would need

FEATURED PROJECTS

5th-CRG-IMS | React, Next.js, Node, Cloudinary, Firebase

- End-to-end inventory tracking system: item borrowing, fuel management, and media documentation
- Integrated Firebase for live data and Cloudinary for image/video storage

TruckAlert | Java, REST API, Arduino, ESP32, COCO Dataset

- IoT + AI blind-spot monitoring system detecting vehicles, bikes, people, and animals in real time
- Combined hardware integration (ESP32-CAM, sensors) with a wireless, self-contained power setup

EDUCATION

Bachelor of Science in Information Technology | Holy Cross of Davao College

Aug 2022 – Jun 2026

- Coursework: IT Elective, Networking, Information Management, Introduction to Computing
